About Us

One World, plenty of solutions!

Genisys Group is a novel diversified multinational enterprise that operates globally. It specializes in advanced medical research, high-tech and security systems, as well as ventures in the financial sector and diversified investments.

The group is entirely under the control of Genisys International Trust and is financially autonomous.

Moreover, the group has an unwavering dedication to socio-economic programs and initiatives via its philanthropic arm - Genisys Foundation. This support extends to budding entrepreneurs, start-ups, and social welfare schemes for future generations.

The Group

Genisys Group is a conglomerate that brings together various enterprises operating in crucial business domains. This enables the group to provide essential services not only to its own subsidiaries, but also to external entities that meet the eligibility criteria.

The specialized services offered by Genisys Group are tailored to meet the unique needs of each client, ensuring that they receive the highest level of support possible. With its extensive network and expertise across multiple industries, Genisys Group is well-equipped to provide comprehensive solutions that drive success for all parties involved.

Subsidiaries

✦✦ Genisys Dynamics

Genisys Dynamics is a renowned company that specializes in technology integration and engineering. They have established themselves as an innovative leader in this field by bringing together multiple organizations that are at the forefront of cutting-edge technological advancements. Their success can be attributed to their relentless research efforts, which they carry out through collaboration with prestigious universities and other esteemed research institutions.

Genisys Dynamics has made a significant impact on the industry by procuring strategic companies, which has further bolstered their position as a leader in this rapidly evolving industry. The company's commitment to innovation and excellence is unwavering, which is evident from the groundbreaking advancements they have achieved so far.

Their approach towards technology integration and engineering has been appreciated by many, which has contributed to their growing popularity. Genisys Dynamics' expertise lies in combining various technologies to create solutions that are not only efficient but also sustainable.

With their steadfast commitment to innovation and excellence, Genisys Dynamics is poised to continue driving groundbreaking advancements in technology for years to come. They have set a benchmark for others in the industry with their remarkable achievements, making them one of the most sought-after companies for technological advancement projects.

Genisys Foundation

Socio-Economic Task Force Serving Humanity

Genisys Foundation is a not-for-profit organisation, with multiple platforms, working in various social and critical areas. Its primary objectives include providing assistance to businesses and families experiencing financial difficulties, promoting land revaluation, safeguarding the environment, enhancing healthcare for underprivileged communities, facilitating youth employment by financing and developing projects and startups, as well as addressing other vital societal concerns.

The foundation offers financial support for worldwide projects that concentrate on disadvantaged nations. Although group companies and affiliated entities are the primary developers of funded projects, the foundation may provide direct financing in the form of a non-recourse loan for exclusively humanitarian ones.

Funding activities are mainly acquired through Genisys International Trust funds sanctioned by its Board of Trustees, as well as external organizations. The holding company acts as a supportive structure for social initiatives executed by the foundation. It integrates companies with industry-specific knowledge to enable appropriate monitoring, control and supervision of humanitarian projects. This strategy optimises resources while partially recovering funds that will be allocated towards additional social initiatives to maintain group activities' smooth operation - this approach is referred to as the circular economy.

✦ Program Pandora

This cutting-edge stem cell technology is driving an advanced medical and life-extension program. We are proud to partner with one of the most prestigious medical research centers in the Asia Pacific region, whose premier neural stem cell transplantation department has been utilizing stem cell therapy since 2003 to treat a range of conditions such as hypertensive brain hemorrhage, cerebral thrombosis, traumatic brain injury sequence, spinal cord injury sequence, cerebral palsy, multiple system atrophy and more.

P R O G R A M P A N D O R A

With tens of thousands of patients treated to date, this center's world-leading level is evident not only in its treatment efficacy but also in the sheer volume of cases it handles.

This state-of-the-art facility boasts a GMP-certified laboratory for stem cell research and preparation that is both large-scale and well-equipped. The center takes great care during its rigorous research and development process as well as throughout its strict attitude towards ensuring optimal quality control during the culture process - all contributing factors which enable consistently high levels of healing effectiveness.

Group's Projects

Genisys Group is a new and emerging organisation, strengthened by its rich historical background and the specialised expertise of its experienced team members who are well versed in strategically important sectors.

The Group, together with its subsidiaries, has several programmes and investments in the pipeline for the near, medium and distant future.

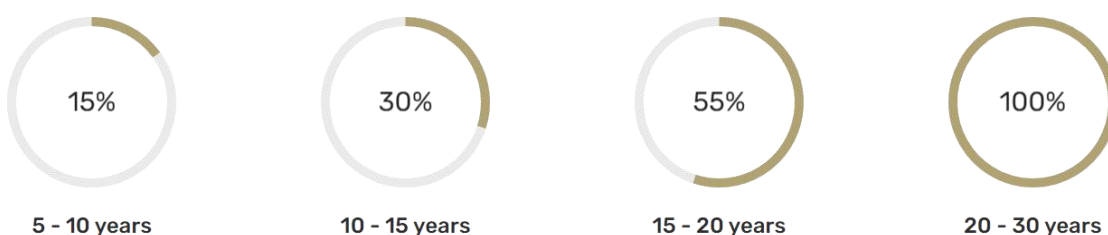

It is worth noting that some of these projects will focus on humanitarian and socio-economic development and will be created and funded directly by Genisys Foundation.

With a clear vision and a strong commitment to excellence, Genisys Group is poised to make significant contributions to various industries in the coming years.

- **Commercial:** Business-focused initiatives and undertakings created by entities within the Group.
- **Humanitarian:** Humanitarian initiatives created primarily by corporations and financially supported by the Foundation.
- **Socio-economic:** Projects and activities with a socio-economic focus, mainly developed by Group companies and funded through joint collaboration between the Group and the Foundation.
- **Third parties (financing):** The foundation offers financial support, in whole or in part, to projects and initiatives of third parties that are of a commercial nature or that have a focus on socio-economic issues. These endeavors may encompass business or social welfare activities, and the foundation serves a crucial function in seeing them through to completion. By providing financial aid and other types of assistance, the foundation facilitates positive change across a range of societal sectors while also stimulating economic growth and development. Whether aiding through direct funding or other measures, the foundation continuously strives to support meritorious initiatives that can make a significant impact on individuals' lives.

Project Development Timeline

Below is a graphical representation of the projected development timeline over three decades. The visuals provide an approximate quantitative estimate of the number of projects planned to be executed during the specified time frame.

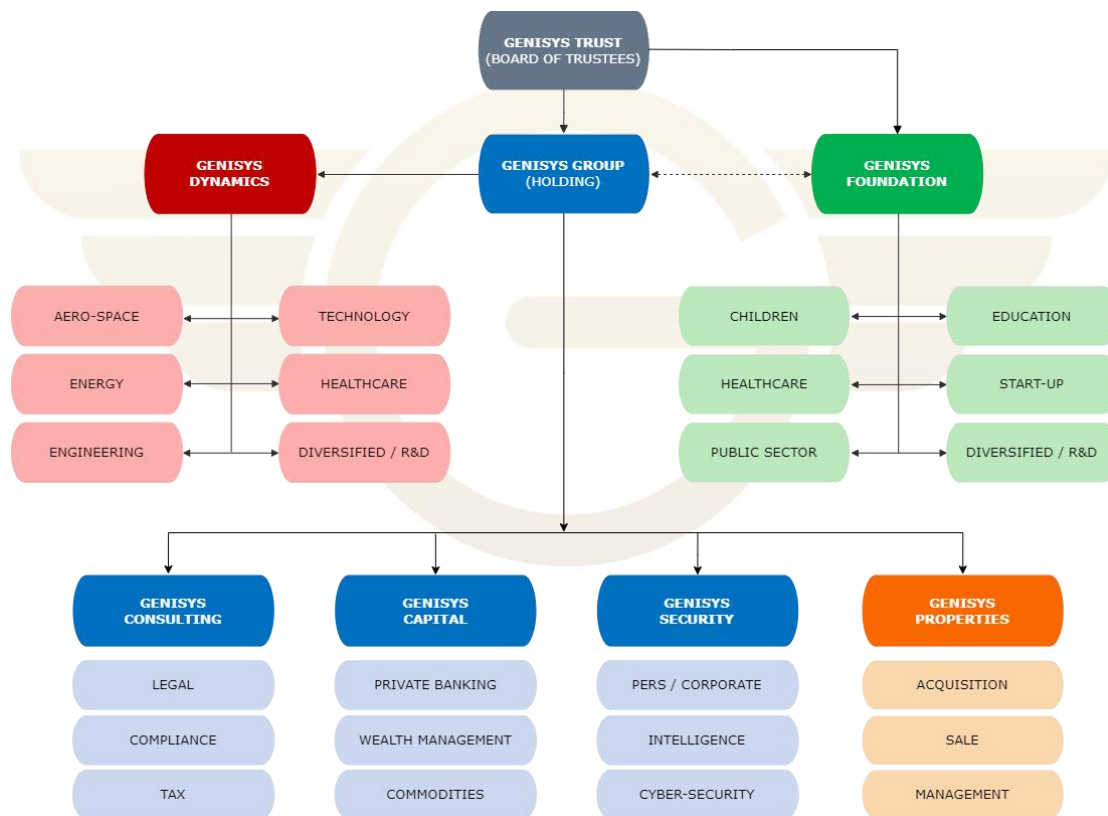

Group Structure

Below you'll find a detailed visual representation of the organization's structure, as well as an overview of its diverse activities, composition, strengths and unique attributes.

This will provide you with a clear understanding of the group's day-to-day operations and functionalities.

By analyzing this visual representation, you'll gain invaluable insight into the inner workings of this dynamic organization. You'll be better prepared to engage with it effectively.
